

ABOUT

Spilltration Husky Pads

Spilltration Husky Pads are great for absorbing oil or fuel spills. One pack of Husky pads can absorb up to 10 litres of hydrocarbons whilst filtering clean water.

Applications:

- 40 x 40cm Husky Pads are made for rapid response to soak up the bulk of any oil or fuel spill.
- Husky pads clean up diesel, kerosene, hydraulic fluid, motor oil and other hydrocarbons.
- Do NOT use with acids or caustics.

ONE PACK
ABSORBS
UP TO
10L

Spilltration products are engineered to clean up oil-based leaks, drips, and spills.

They can be used indoors and outdoors in all weather conditions. Husky products are unique in that they:

- Absorb oil and filter water.
- Pick up oils from water 5x faster than traditional absorbents.
- Spilltration absorbents come supplied vacuum-packed to fit in areas up to 80% smaller than traditional polypropylene absorbents.
- Reduce waste disposal costs compared with traditional absorbents.
- Can be wrung out and are reusable up to 10x
- Protect the environment.
- Reduce clean up time by 50%
- Save up to 500% in overall usage costs.
- Are made from 100% post-consumer waste.
- Sediment Filtration Rating: 53 microns (.53mm)
